

CETRIS® DEKOR

A cement bonded particleboard 12 and 14 mm thick, dimensions 1250 x 625 mm, with a decorative acrylic mosaic plaster.

www.cetris.cz

The biggest producer of the cement bonded particleboards in Europe

CETRIS® DEKOR is a cement bonded particleboard 12 and 14 mm thick, dimensions 1250 x 625 mm, with a decorative acrylic mosaic plaster and the grain size ranging from 0.6 to 1.2 mm. The CETRIS DEKOR boards are delivered in four colours according to a colour chart. If buying larger quantities, it is possible to deliver CETRIS® DEKOR boards in other thicknesses and colours after consultation with the producer.

The boards can be sawn by a circular saw with a saw blade which is made hardened steel. To achieve a clear straight cut, use a guide-rail and cut from the underside, thus protecting the face side. After the sawing, the edge must be treated with a primer (supplied by the producer). Drill holes without hammering action on a solid pad. We recommend drills for metal to be used. Drill only from the face side.

The boards should be used predominantly as exterior facade boards for vertical lining of plinths, facades, railing panels or roof soffits.

Technical specifications:

basic size:
1250 x 625 mm

thickness:
12, 14 mm

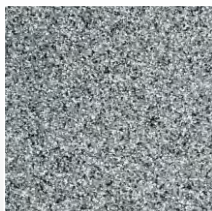

surface mass:
THK 12 mm - 20 kg/ m³
THK 14 mm - 23 kg/ m³

assistance:
on demand - sawing

relief type:
mosaic decorative plaster

colours:
as per the sampler of CETRIS® DEKOR boards
